Percentage: **78%**

Professional Experience

Java Developer Intern

Bhopal

RamraJTech, Bhopal

01/08/2024 – 24/08/2024

- Developed a Hotel Management System using **Core Java**, **JDBC**, and **MySQL**.
- Built features like room reservation, view/update/delete registration, and room lookup.
- Used console-based UI with switch-case and Scanner input, fully integrated with database.

Projects

TIT Tnp Attendance Marker System

[Link](#) 

- **Technology used:** Core Java, JDBC, MySQL, SQL
- Built a console-based app to record attendance for special training classes in college/company.
- Only authorized staff can log in using secure username and password.
- Added Search by Student ID feature to quickly find any student– made checking faster by **40%**.
- System saves **50%** of faculty time, uses **0%** paper, and removes **100%** manual work.

Govt Polytechnic Latehar College Website

[Link](#) 

- **Technology used:** HTML, CSS, JavaScript, Tailwind
- Integrated chatbot (Tawk.to) that provides instant links, college info, and notices; reduced direct page visits by **70%**.
- Designed a centralized notes section to reduce **80%** students' time spent searching books/notes; improved access by **60%**.
- Added live college notifications to keep students instantly informed.

Student Feedback App (Full-Stack)

[Link](#) 

- **Technology used:** Node.js, Express.js, MongoDB, EJS, JWT
- Developed a feedback system for students to submit ratings and feedback to faculty securely.
- Built user authentication using JWT and bcrypt for registration/login.
- Integrated separate views for students and admin (feedback dashboard). Admin sees feedback only, not student identity.
- Enabled admin to view, filter, and manage student feedback in real time.
